

Room 206 Smartboard Basics

1. Turn on the computer tower
2. From the remote located in the cradle on the smartboard, press the ON button to start the projector. When the board is on successfully, it will show a green LED light
3. After 1 minute, the computer login-screen should be visible
4. Login with the following information:
ID: smartbrduser
Password: guest206
5. You may see the smartboard floating tools appear on screen. If you wish to hide these, click the smartboard icon at the bottom right part of the task bar, and then select “hide floating tools.”
